EDUCATION

B.E in Information Technology, Shree L.R Tiwari College Of Engineering, 8.73 CGPA 2021-2025

HSC (Science) Bi-focal Computer Science, Elphinstone College, 80.6% 2019-2021

SSC, St. Francis D'Assisi High School, 82.6% 2018-2019

SKILLS

- **Programming Languages:** Java, JavaScript, C++, HTML/CSS
- **Database and Language:** MySQL, SQL
- **Analytics Tools:** Power Bi, Excel
- **Version Control Tools and IDE:** Git, Github, Visual Studio Code

PROJECTS

IoT- based Food Spoilage Detection System

- Developed an IoT-based food spoilage detection system utilizing ESP32, MQ-14, and DHT11 sensors to monitor gas levels, temperature, and humidity, with real-time data transmission to a XAMPP server for processing and display on a personal website.
- Implemented Arduino code to accurately read and transmit sensor data, integrating HTTP POST requests for reliable communication between the IoT device and the server.
- Calibrated and set spoilage thresholds by analyzing sensor data from fresh to spoiled food items (rice and dal), enabling spoilage predictions.
- Enhanced food safety and waste reduction through applications in grocery stores, food donation programs, and cold chain management by predicting and preventing food spoilage.
- **Tech stack used:** HTML/CSS, JavaScript, PHP, XAMPP, MYSQL, Arduino IDE

Pankhudi- Flower Selling ECommerce Website

- Developed an online store for selling a variety of flowers, showcasing detailed product descriptions and high-quality images.
- Implemented a cart system allowing users to add, update, and remove flower items, providing a seamless shopping experience.
- Designed a demo online payment feature to illustrate transaction flow, enhancing the user experience without actual payment integration.
- Created an admin interface to track orders, manage inventory, and monitor sales, providing comprehensive control over the online store operations.
- **Tech stack used:** HTML/CSS, JavaScript, NodeJS, MongoDB

Disaster Management System

- Developed a disaster management app using Java and MySQL for post-disaster relief.
- The app allows users to log in as donors, volunteers, or admins to enter disaster locations, identify causes, and facilitate donations of grains, clothes, and monetary aid.
- Utilized JDBC for database management, ensuring secure and efficient data handling.
- **Tech stack used:** Java, MYSQL, JDBC

SOFT SKILLS AND LANGUAGES

Soft Skills: Collaboration, Communication, Planning, Teamwork, Time Management, Leadership,

Quick Learner

Languages: English, Hindi, Urdu

DECLARATION

I hereby declare that all the above-mentioned information is true to the best of my knowledge and belief.

Place: **Mumbai**
